

**Tuesday March 25th
at Creekside Community
Common House**

The BV Naturalists present:

Red Snow and Climate Complexity: A snow algae's eye view of the world

**“Watermelon snow”
darken the snow
surface, thereby
accelerating snow
melt.**

**At the same time,
snow algal blooms
are endangered by
loss of summer
snowfields.**

**How they colonize
the snow surface
each spring remains
a mystery.**

**Dr. Casey Engstrom will introduce you to these
charismatic microflora and share stories of
searching for them in the mountains of BC.**

Note the new location: 1141 Ambleside Ave.

Park in Visitor Parking area, or on Ambleside Ave.
